Profile

Full-stack developer and 42 Lausanne graduate with experience building web applications across frontend interfaces, backend APIs, authentication and data persistence. Primarily working with React, TypeScript, Node.js and Express, with additional experience in SQL, Prisma, MongoDB, PHP and Docker. Background in sound engineering and interactive media, combining software development with complex creative and collaborative projects.

Technical Skills

Frontend	React, TypeScript, JavaScript, HTML, CSS, Vite, React Router
Backend	Node.js, Express.js, REST APIs, PHP, Socket.IO
Databases	SQL, SQLite, Prisma, MongoDB
Authentication	OAuth 2.0, JWT, sessions, HTTP-only cookies
Infrastructure	Docker, Git, Shell, Linux/Unix
Systems	C, C++, networking, HTTP, C#, Tone.js, Web Audio

Projects

2025	SPEN Digitalisation Hackathon <i>Service pénitentiaire, Lausanne</i> Participated in a week-long hackathon focused on designing and prototyping a digital solution to support day-to-day operational workflows in a correctional-services environment. Collaborated with a multidisciplinary team to translate operational needs into application concepts and functional prototypes while respecting institutional confidentiality requirements.
2026	Graph42 <i>React, TypeScript, Express, Prisma</i> Full-stack dashboard and visualisation platform around the 42 API. Implemented a React/Vite frontend and Express backend with OAuth authentication, REST endpoints, filtering, pagination and server-side API integration. Built a Prisma-backed relational data mirror with synchronisation, API fallback, rate-limit handling and token caching.
2026	Web DAW <i>React, TypeScript, Node.js, Tone.js</i> Browser-based digital audio workstation developed as a collaborative final project at 42 Lausanne. Implemented tracks, regions, routing, buses, automation, MIDI, editing and export, working across client architecture and backend persistence/file-handling endpoints.
2026	IRC Web Application <i>React, Express, Socket.IO, MongoDB</i> Real-time chat application with user authentication, rooms, channels, friendships, private communication and persistent data.
2026	PHP Web Applications <i>PHP, SQLite, SQL</i> Built authentication and gallery applications with email verification, sessions, image uploads, likes, comments, pagination and user-owned content, applying relational database design and server-side validation.

Education

2024–2026	Architecte en Technologie du Numérique <i>42 Lausanne</i> Project-based software engineering curriculum covering C/C++, algorithms, Unix systems, networking, HTTP, web development, containers and collaborative software development.
2019–2023	Bachelor of Arts in Sound Engineering – First-Class Honours <i>SAE Institute, Geneva</i> Three-year programme focused on sound engineering, production and sound design, including an interactive research project on the Uncanny Valley in video-game audio.

Experience

2022–2024	Freelance Audio Engineer & Live Production Technician <i>Various clients and venues</i> Managed technical production, troubleshooting and client requirements across music, audiovisual and live-event projects, working independently and collaboratively in production environments.
2019	Aviation Administrative Assistant <i>Swiss Army, Aviation Unit</i> Administrative assignment within the ordnance bureau of a Swiss military aviation unit.
