

Giulio Valente

Sound Engineer, Sound Designer, Software Engineer

Profile

Sound engineer and sound designer with a passion for gamedev and software design. I have formal music training, a Bachelor of Arts in Sound Engineering and I have recently terminated the common core of School 42 to obtain the title of “Architecte en Technologie du Numérique”. Available for freelance and permanent positions — contact via GitHub or linktr.ee links.

Education

2024–present **Architecte en Technologie du Numérique, School 42**
Currently working on a web based DAW as final project

2019–2023 **Bachelor of Arts, Sound Engineering, SAE Institute**
Three-year program, graduated 2023.

2017–2019 **Music Studies (ETM), Guitar & Voice**
Focused on performance and theory.

Experience

2022–2024 **Audio Technician / Production (freelance)**
- Live and studio audio setup, patching, maintenance and troubleshooting.
- Responsible technician for small production runs and venue black-box operations.

2019 **Aviation Administrative (Swiss Army, 6 months), Ordnance Bureau**
- Office and administrative tasks within aviation unit.

2019 **Sound Design (student project), Final-year project – interactive 3D simulation**
- Created sound design for a 3D island exploration simulation with two cave environments.
- Implemented realistic cavern acoustics in one environment and deliberately altered fidelity/processing in the second cavern to produce contrasting spatial and perceptual experiences.

Projects

Software Visit my public repo to see my work as software developer (school 42, indie games, music production software): <https://github.com/gvalente95>

Game/Sound 3D simulation (final project for SAE Institute): environmental ambisonics/immersive mixing, procedural triggers for cave ambiances, layered Foley and reverberation profiling to differentiate perceived realism.

Studio Work Various short-term mixes and live-sound duties during SAE studies and freelance technician work.

Skills

AI Proficient user of AI tools, used to agentic workflows (Claude Code, OpenCode)

Lausanne – Switzerland

Programming C, C++, Shell Scripting, Docker, React
Audio Field recording, mixing, mastering, Foley, sound design for games/interactive media
Tools DAWs: Pro Tools, Reaper, Ableton; plugins: Waves, Valhalla; basic scripting for interactive audio (implementation-ready concepts)
Other Live-sound rigging, stage patching, technical maintenance

Languages

French (native/ fluent) English (proficient) Italian (basic)
