Profile

Sound engineer and sound designer with a passion for game development, interactive media and software design. I have formal music training, a Bachelor of Arts in Sound Engineering and obtained the title of “Architecte en Technologie du Numérique” by completing the Common Core curriculum at School 42.

Completed the School 42 curriculum with a final team project recognized for excellence. As part of a five-person team, I designed and developed a fully featured web-based digital audio workstation integrated into a collaborative music-sharing platform.

Education

2024–2026	Architecte en Technologie du Numérique <i>School 42, Lausanne</i> Completed the School 42 curriculum. The Final team project consisted of developing a collaborative music-sharing platform. Within a team of five, I designed and implemented a complete browser-based digital audio workstation.
2019–2023	Bachelor of Arts in Sound Engineering <i>SAE Institute, Geneva</i> Three-year programme focused on sound engineering, production and sound design. Awarded with a first class honors Bachelor of Arts degree in 2023.
2017–2019	Pre-professional Music Programme <i>ETM, Geneva</i> Pre-professional training focused on guitar performance, ensemble playing, studio musicianship, music theory, ear training and harmony.

Experience

2022–2024	Freelance Audio Engineer & Live Production Technician <i>Various clients and venues</i> - Mixed and mastered music releases, short films and other audiovisual projects for independent artists and productions. - Worked as an audio technician and stage manager across concerts, festivals and live events. - Managed stage setup, audio systems, patching, equipment maintenance and technical troubleshooting in live production environments.
2019	Aviation Administrative Assistant <i>Swiss Army, Ordnance Bureau</i> - Completed a six-month assignment within an aviation unit. - Performed office and administrative duties within the ordnance bureau.

2019

Bachelor's Thesis
SAE Institute

- Conducted research on the application of the Uncanny Valley effect to video game audio.
- Designed and evaluated an interactive game environment to investigate how different levels of audio realism influence player perception and emotional response.
- Awarded First-Class Honours (mention d'excellence) for the quality of the research and its practical implementation.

Projects

Software	School 42 projects, independent games and music-production software. Source code available at github.com/gvalente95 .
Web DAW	Browser-based digital audio workstation developed with React and TypeScript, featuring tracks, regions, routing, automation and audio-editing tools.
Game and Sound	Interactive 3D simulation featuring environmental ambisonics, immersive mixing, procedural cave ambience triggers, layered Foley and reverberation profiling.
Studio Work	Short-term mixing, recording and live-sound assignments completed during SAE studies and freelance technical work.

Skills

Programming	C, C++, C#, TypeScript, JavaScript, React, HTML, CSS, Shell scripting and Docker.
Audio	Field recording, mixing, mastering, Foley and sound design for games and interactive media.
Tools	Pro Tools, Reaper, Ableton Live, Logic Pro X, Unity, Blender, Wwise, Photoshop, Final Cut.
AI	Experienced with AI-assisted and agentic development workflows, including Claude Code and OpenCode.
Technical	Live-sound setup, stage patching, equipment maintenance and troubleshooting.

Languages

French	Native
Italian	Native
English	Proficient

Additional Information

Citizenship	Swiss
Availability	Freelance and permanent positions
Work style	Flexible scheduling
